

Program Timeline

This **program** is an *epic adventure*. Each week, you'll learn and apply new skills, and share successes and challenges with your [learning community](#).

Set Yourself up for Success:

1. The timeline we've suggested assumes you'll work at a minimum of 10 hours per week. Set aside that time on your calendar so you can stay on track.
2. It is not required that you meet specifications for projects in order to complete this program; however, getting feedback and improving on your work is the best way to learn the skills you'll need to be prepared to pass your certification exam. You can submit and resubmit projects as many times as necessary to meet specifications, but the time needed for this will be different for different students and is not reflected on the below timeline.
3. Deadlines for projects in your classroom are those suggested for students in the Android Nanodegree Program, but the Fast Track Program has less content and a different timeline. Use the below timeline to ensure you complete the projects before your 3 months of access is over.

Click [here](#) to download this timeline, and [here](#) to see how to mark tasks as completed.

Week	What to work on
Project 1: Popular Movies, Stage 1 Learn the skills in Developing Android Apps	
Week 1	<ul style="list-style-type: none">❑ Complete the Welcome Lesson❑ Make sure you have a Google account and it's linked to your Udacity account!❑ Complete Create Project Sunshine❑ Complete Connect to the Internet❑ Complete RecyclerView
